

ENVIRONMENTAL POLICY

Since 1964, our 333 rooms have been home to diplomats, heads of state, prominent artists and famous athletes, many of whom have made and continue to make history. Our restaurant "Woods" offers local and seasonal cuisine. Our guests also have the opportunity to quench their thirst at the "Nations" bar, which offers a vintage cocktail menu.

At InterContinental Genève, and more broadly at IHG, we believe that luxury can be responsible. We strive to manage our business in an environmentally and socially responsible manner, with a focus on quality and continuous improvement. We are indeed aware that our activity has a significant impact on our environment.

Therefore, the hotel's environmental policy is based on three pillars

- The IHG Green Engage program
- Green Globe certification
- The Ambition Négawatt charter in partnership with the Services Industriels de Genève (SIG).

Through our environmental policy, we are committed to caring for the planet. InterContinental Genève's objectives include the following goals

- Reduce the environmental impact of our activities by optimizing the consumption of natural resources and energy and by developing solutions for the recycling economy
- Involve all employees, suppliers and partners in a process of continuous improvement in collaboration with our customers, in order to better meet the needs of the community
- Comply with and, where appropriate, exceed relevant environmental regulations
- Educate customers and employees about the environment by promoting a healthy lifestyle
- Inform our customers, partners and the public about the company's environmental activities by intensifying public relations work.
- To contribute to the sustainable development of our environment.

This hotel is owned by Hôtels Intercontinental, Genève SA and managed by InterContinental Hotels Group Services Company.

In order to reduce our impact, we communicate our expectations to external parties and suppliers in a transparent manner.

Our priorities are to:

- Limit ourselves to actual purchasing needs in order to avoid unnecessary surpluses
- Give preference, whenever possible, to recycled, reusable, repairable, biodegradable, recoverable, fair trade and/or eco-labeled products
- Choose vegetables and fruits in season
- Minimize solid waste
- Ask our suppliers to adhere to fair labor and business practices, respecting labor laws and providing the required proof.

Geneva, November 1, 2020

Jürgen KREIPL
Managing Director
